

machine-information**S_008**

category: warping machine
type: HDSM 2 / 130 patternbeam-warping machine
manufacturer: Karl Mayer year of construction: 1995
serial no.: 11936

warping machine for pattern beams 130"
no. of independent waring positions: 2
driving roller: separated in middle
yarn controll system: mechanical controll device
yarn tention device on creel: machanical
Voltage Main Engine: 380 V / 50 Hz
warping creel: in total 59 spools

cotton oeling device: yes (2 positions)
rivinding device for pattern beams: yes

volume of loading: 4 loading meters

for information pls. contact: n.mach@spiga-gmbh.com (Nico Mach)
